

Feasibility Study
02-096-0058

Utilities

- Water
 - An 8" water line runs from the intersection of 500 South and 485 West, heading West to the end of the pavement. We will tap in at this point and bring it throughout the project.
- Sewer
 - There are two sewer manholes at the intersection of 500 South and 485 West. We will use a pressurized sewer system to lift to this access point.
- Storm Drain
 - Storm drains are yet to be determined but will meet all Providence City requirements.
- Gas
 - This will be brought in from the SE corner of the property.
- Power
 - This will be brought in from the SE corner of the property.
- Communication Services
 - This will be brought in from the SE corner of the property.
